PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and Business Analytics undergraduate with hands-on experience in data analysis, ETL-style data preparation, EDA, KPI reporting, and dashboard development. Proficient in Python, SQL, Excel, Power BI, and Tableau for data cleaning, trend analysis, and stakeholder-ready reporting. Proven ability to deliver actionable insights that support data-driven business decisions.

TECHNICAL SKILLS

Programming & Querying: Python (Pandas, NumPy), SQL (Joins, Aggregations, Grouping, Subqueries)
BI & Visualization: Power BI (DAX, Data Modeling, KPI Dashboards), Tableau, Excel (Pivot Tables, XLOOKUP, Charts)
Analytics: Exploratory Data Analysis (EDA), KPI Reporting, Trend Analysis, Business Reporting
Data Practices: Data Cleaning, Validation, Quality Checks, ETL Preparation, Documentation
Tools & Platforms: Jupyter Notebook, Google Colab, VS Code, Git, GitHub, MySQL

EXPERIENCE

Data Analytics Job Simulation Intern | Deloitte (via Forage) *Apr 2025 – Oct 2025 | Remote*

- Completed a real-world data analytics simulation focused on business problem-solving and risk analysis.
- Performed forensic data analysis to identify anomalies and risk indicators in structured datasets.
- Built an interactive Tableau dashboard to visualize insights and support executive decision-making.
- Cleaned and validated datasets using Excel, improving data accuracy and reporting clarity.

Data Science Intern | Edu Tantr *Jun 2025 – Sep 2025 | Bangalore, India*

- Conducted end-to-end data analysis using Python (Pandas), SQL (MySQL), and Excel on business datasets.
- Analyzed revenue trends, regional performance, and product profitability to support data-driven decision-making.
- Developed a Power BI dashboard with KPIs, slicers, and drill-downs for category, region, and product analysis.
- Wrote optimized SQL queries using joins, aggregations, and grouping for trend and comparative analysis.
- Identified top-performing products and high-revenue regions, improving stakeholder reporting efficiency.
- Published dashboards, SQL queries, and Python notebooks on GitHub for documentation and reuse.

PROJECTS

Netflix Data Analysis | Python, Power BI, Git *Feb 2026 – Mar 2026*

- Analyzed a dataset of 16,000+ Netflix titles to identify trends in content distribution, ratings, and genre popularity.
- Performed data cleaning and preprocessing using Python (Pandas), handling missing values and preparing data for analysis.
- Conducted EDA to examine patterns in content production by year, country, and genre.
- Built an interactive Power BI dashboard to present insights and support data-driven decision-making.

Blinkit Sales Analytics Dashboard | Python, Power BI, SQL, Git*Dec 2025 – Jan 2026*

- Designed a Power BI sales dashboard tracking revenue, orders, and customer engagement KPIs.
- Built data models and DAX measures to monitor performance across product categories and time periods.
- Reduced manual reporting time by ~40% by automating KPI tracking and visual analysis workflows.

Uber Rides Data Analysis | Python, Power BI*Sep 2025 – Oct 2025*

- Analyzed Uber ride datasets using Python (Pandas) and Matplotlib to identify peak booking hours and ride purposes.
- Performed EDA to understand user behavior, demand trends, and ride frequency patterns.
- Designed and deployed interactive Power BI dashboards using DAX, data modeling, and KPI frameworks for business reporting.

EDUCATION

B.Tech in Computer Science (Data Analytics) | Madanapalli Institute of Technology and Sciences*Aug 2023 – May 2027 | Madanapalli, AP*

Class 12 – State Board | Sri Chaitanya Junior College*Sep 2021 – Mar 2023 | Madanapalli, AP*
