PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and Business Analytics undergraduate with hands-on experience in data analysis, ETL-style data preparation, EDA, KPI reporting, and dashboard development. Proficient in Python, SQL, Excel, Power BI, and Tableau for data cleaning, trend analysis, and stakeholder-ready reporting. Proven ability to deliver actionable insights that support data-driven business decisions.

TECHNICAL SKILLS

Programming & Querying: Python (Pandas, NumPy), SQL (Joins, Aggregations, Grouping, Subqueries)

BI & Visualization: Power BI (DAX, Data Modeling, KPI Dashboards), Tableau, Excel (Pivot Tables, XLOOKUP, Charts)

Analytics: Exploratory Data Analysis (EDA), KPI Reporting, Insight Generation, Business Analytics

Data Practices: Data Cleaning, Data Validation, Data transformation, Documentation

Tools & Platforms: Jupyter Notebook, Google Colab, VS Code, Git, GitHub, MySQL, Streamlit, GitHub Actions, Supabase

EXPERIENCE

Data Analytics Job Simulation Intern | Deloitte (via Forage)

Apr 2025 – Oct 2025 | Remote

- Completed a real-world data analytics simulation focused on business problem-solving and risk analysis.
- Performed forensic data analysis to identify anomalies and risk indicators in structured datasets.
- Built an interactive Tableau dashboard to visualize insights and support executive decision-making.
- Cleaned and validated datasets using Excel, improving data accuracy and reporting clarity.

Data Science Intern | Edu Tantr

Jun 2025 – Sep 2025 | Bangalore, India

- Conducted end-to-end data analysis using Python (Pandas), SQL (MySQL), and Excel on business datasets.
- Analyzed revenue trends, regional performance, and product profitability to support data-driven decision-making.
- Developed a Power BI dashboard with KPIs, slicers, and drill-downs for category, region, and product analysis.
- Wrote optimized SQL queries using joins, aggregations, and grouping for trend and comparative analysis.
- Identified top-performing products and high-revenue regions, improving stakeholder reporting efficiency.
- Published dashboards, SQL queries, and Python notebooks on GitHub for documentation and reuse.

PROJECTS

Customer Churn Analytics Platform | Python, SQL, streamlit, GitHub Actions

May 2026 – July 2026

- Developed an end-to-end Customer Churn Analytics Platform using Python, Streamlit and PostgreSQL hosted on Supabase to analyze customer behavior and churn trends.
- Built an automated ETL pipeline for data generation, transformation, validation, and loading, with GitHub Actions for daily scheduled execution.
- Designed interactive Business Intelligence dashboards featuring KPI cards, customer insights, churn analysis, dynamic filters, and data export (CSV & Excel).
- Implemented SQL for efficient database connectivity and developed pipeline monitoring with logging to improve data reliability and automation.

Netflix Content Trends & Performance Dashboard | Python, Power BI, Git

Dec 2025 – Jan 2026

- Performed end-to-end exploratory data analysis on a 16,000+ record Netflix titles dataset using Python (Pandas, Matplotlib), cleaning and transforming raw data to uncover content trends across genres, countries, and release years
- Built an interactive Power BI dashboard with KPIs and dynamic filters (year, country, language, content type) to visualize Movies vs. TV Shows distribution, genre popularity, and ratings breakdown
- Delivered data-driven insights identifying key content trends — including a post-2015 surge in content production and the U.S. as the top content-producing country — showcasing skills in data cleaning, EDA, and dashboard development
- Analyzed content rating and popularity patterns to identify correlations between audience ratings and content reach, translating findings into actionable insights for content strategy and demonstrating strong data storytelling capabilities

- Analyzed Uber ride datasets using Python (Pandas) and Matplotlib to identify peak booking hours and ride purposes.
- Performed EDA to understand user behavior, demand trends, and ride frequency patterns.
- Designed and deployed interactive Power BI dashboards using DAX, data modeling, and KPI frameworks for business reporting.

CERTIFICATIONS

- PYTHON – KAGGLE
- Oracle Analytics Cloud – Oracle
- Data Analytics Essentials – Cisco
- Data Science & Analytics – HP LIFE
- Tata's Gen AI Powered Data Analytics – TATA via [Forage]
- DATA Visualization– KAGGLE

EDUCATION

B.Tech in Computer Science | Madanapalli Institute of Technology and Sciences Aug 2023 – May 2027 |
Madanapalli, AP

Class 12 – State Board | Sri Chaitanya Junior College Sep 2021 – Mar 2023 |
Madanapalle, AP

Class 10 – State Board | Sri Chaitanya EM HIGH SCHOOL June 2021 |
Madanapalli, AP
